

PURE Shooter.net[®]

DIAGRAM OF THE GAME

40 SHOTS 80 POINTS 20 BONUS PTS. 100 TOTAL PTS.

HOW TO PLAY

PURESHOOTER.NET (*Pure Shooter 100*) is a 40-shot individual shooting contest with 100 possible points, from a lay-up to midrange shots to treys around the arc in a series of semicircles, finishing at the free throw line.

AROUND THE KEY The game begins with a lay-up and moves up the right side of the lane, around the top of the key, and down the left side, 10 shots worth 2 points each for a possible total of 20 points.

INNER ARC Next the shooter moves left to right shooting 10 shots worth 2 points each, inside and within three feet of the three-point line, for a possible total of 20 points.

OUTER ARC Moving from right to left, the shooter launches 10 treys worth 3 points each for a possible total of 30 points.

FREE THROW LINE The game finishes where it should, at the line, with 10 free throws for a possible total of 10 points. *Thus, there is a possible overall score of 80 points with the 40 shots.*

BONUS POINTS Each of the four 10-shot categories has the same bonus schedule: 3 points for 8 shots made, 4 points for 9 shots made, and 5 points for 10 shots made. *Thus, the possible total score for Pureshooter.net or Pure Shooter 100 is 100 points.*

TIEBREAKERS Tiebreakers are determined where they should be: at the line. Pure shooters tied for the highest total points will shoot 10 free throws, repeating the tiebreaker until the winner is determined.
